"Only through a clear understanding by every citizen of the objectives, organization, and availability of the Government agencies can they render truly effective service and assure progress toward economic security."

Franklin D. Roosevelt

\* \* \* \* \*

The National Emergency Council for the State of North Carolina operates a clearing house for information concerning the functions and activities of all Federal agencies and departments within North Carolina. Full information as to functions, organization and purposes of each Department and Agency is contained in the United States Government Manual, distributed by the United States Information Service, Washington, D.C. (Manual revised currently - \$2.00).

This office welcomes at all times the opportunity of supplying information to the people of this State.

The National Emergency Council

Robert M. Gantt  
State Director

# CHAPTER I

## THEORY OF THE EARTH

The earth is a sphere, and its surface is divided into two parts, the land and the water. The land is divided into continents and islands, and the water is divided into oceans and seas. The earth is covered with a thin layer of air, and the air is divided into different layers. The earth is also covered with a thin layer of water, and the water is divided into different layers. The earth is also covered with a thin layer of soil, and the soil is divided into different layers.

## THEORY OF THE HEAVENS

The heavens are divided into different parts, and each part is ruled by a different planet. The sun is the center of the universe, and the planets revolve around it. The stars are fixed in the sky, and they form constellations. The moon is the only satellite of the earth, and it revolves around the earth. The earth is the only planet that has a large body of water on its surface. The earth is the only planet that has a large body of land on its surface. The earth is the only planet that has a large body of air on its surface.

## THEORY OF THE UNIVERSE

The universe is a vast expanse of space, and it contains everything that exists. The universe is made up of matter and energy, and it is constantly changing. The universe is infinite in size, and it has no beginning or end. The universe is the only place where life exists, and it is the only place where we can find meaning and purpose.
